From: KLQP-FM, Madison, MN
KSCR-FM/KBMO-AM, Benson, MN

Just a note to say thanks for producing quality broadcast products at affordable prices, and for backing up those products with some great support services.

At KLQP-FM we have two Bext STL units, a 6 watt main and a 1.5 watt backup, which have been in service for several years. I recently installed a Bext VJ 10,000 transmitter at KSCR-FM. This was my first experience with a Bext transmitter and I was very happy with the unit. Installation was quick and straightforward. I ran into a couple of minor problems which were handled over the phone by your support engineer. In fact, this was the first time I ever had a company's support person call me to ask how things were going!

Thanks, again for some excellent broadcast products.

Maynard R. Meyer
