Attention: Dennis Pieri, CEO

Subject: Our Bext Television Transmitter

Dear Dennis,

I am writing you to tell you of the pleasure we are experiencing with the Bext Solid State Transmitter purchased from you folks back in December of 1998 ! As the general manager of a Class A, we are short staffed and the last thing I need is to be chasing problems at the transmitter. We decided to go with Bext not only because of your price and reputation, but when asked, your sales people supplied us with all of the information needed to make the decision with no pressure.

After the purchase, I can tell you that we have made the right decision. It is almost 5 years later and all that we have done is occasionally vacuumed the air filters in the front of the transmitter and that is it for service!! We are able to take readings every day remotely with the remote control & telemetry built into the transmitter with the use of computers ,modems, and a dial up line!!!

In conclusion, we have just built a new AM Radio Station on 1440 in our town, and our TV Transmitter gave us the realiability to keep running without missing a beat to do this project. We get a great picture with crystal clear sound 24 hours a day, 7 days a week. The bonus is that when you call Bext, you get to talk to management and engineering without hassle. If I needed a transmitter today, I would call Bext!!

Thank you for saving money on my electric bill by building a well designed transmitter!!
